

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! Please reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service more expensive for me and unaffordable for many.

Under the new proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. The result being low-volume and primarily residential customers would bear the same USF burden as a high-volume residential or business customers. This is not fair!

I use my cell phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. Please vote no to the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

B Person
